Importance: High

Dear Zac

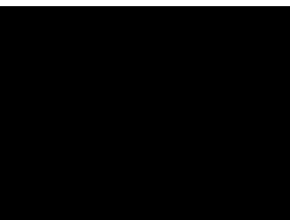

Thank you for the above letter. I have called a few times today and spoke to a lady who asked me to email the confirmed measurements. In response to your request

T45 Ash major deadwood removal and Reduce 3x lowest limbs only by up to 50% to strong lateral growth (this would equate to a linear length 3m maximum)
This pruning is due to fused limbs and decay within these three limbs only, The rest of the tree remains unpruned.

T12 Rowan
Major Deadwood removal and crown reduction of 35%.
(this would equate to a linear length up 1.5m maximum to strong live growth)

Please be aware that [REDACTED] who sent the application on my behalf will be leaving WSCC tomorrow so please do not use his address details please could all correspondence be sent to me

Marcus Brooke
Arboriculturist

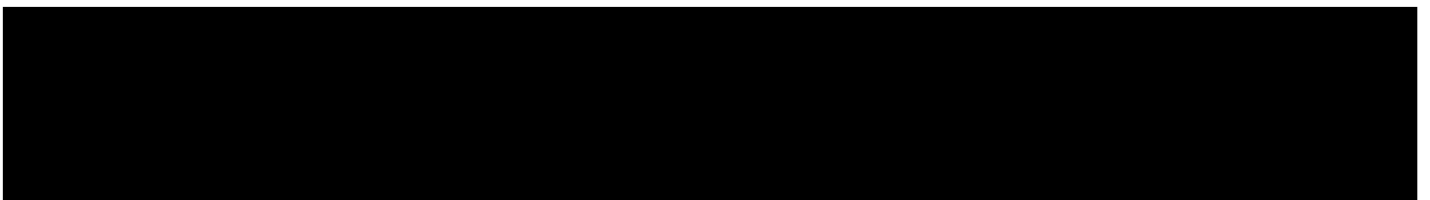

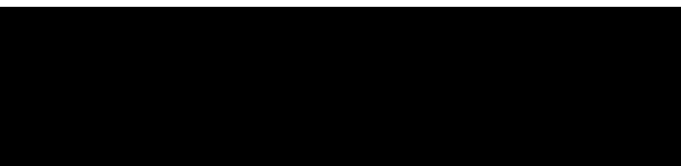

Tel: [REDACTED]

I am endeavouring to get this work completed during the school summer holidays before the school returns for this health and safety works, I am happy to meet with the tree officer at the school to go through the works specification if this helps to streamline the process.

Many thanks

Marcus

Hi Marcus,

Attached is a response from Arun regarding Nyewood application. They can't register because they want reduction measurements in metres. As you know these trees, your guess will potentially be more accurate than mine. 😊

Cheers,

[REDACTED]
