- ...12 Proposed first floor plan
- ...13 Proposed second floor plan
- ...14 Proposed roof plans
- ...15 Proposed front & rear elevations
- ...16 Proposed side elevations
- ...17 Proposed sections

The design and access statement has been written to meet the requirements of Planning Policy Statement 3: Housing (June 2010) and Article 4c of the Town and Country planning orders. In preparation of this design and access statement, consideration has been given to Arun's Local Plan and Interim Housing Policy.

Bognor Regis is one of the main coastal towns in the district with a population of circa 24,000. The Arun Interim Housing Policy seeks to promote new sustainable development within the main urban centres, which are best served by existing services and facilities and generally considered acceptable for conversion projects. The conversion and re-use of existing buildings, particularly within town centres, is encouraged through national tax incentives and local government grants.

The development of the premises falls into the planning guidelines of utilising the first floor and above of town centre properties for domestic occupation, preventing neglect and dilapidation.

Relevant Planning History

BR/182/07/ - Conversion of first floor and additions to create 3 No. flats (Re-submission following BR/8/07) **Approved Conditionally**

BR/8/07/ - Conversion of first floor and additions to create 6 No. flats **Refused**

BR/106/06/ - Proposed first floor conversion from storage area to 2 No. self contained flats **Approved Conditionally**

BR/275/14/PL- Conversion & rear extension to part of ground floor to create 1 No studio flat & conversion of first floor flat to create 2 No 2 bedroom flats. **Approved Conditionally**

Use

There is an abundance of commercial premises within the town centre that remain unoccupied for long periods and a shortage of accommodation that are paramount in the town centre. The proposed development will provide high quality, reasonably priced, furnished temporal accommodation for visitants within the district.

Amount & Scale

The intention is to develop the residential upper floors of the semi commercial premises into Bed and Breakfast accommodation . There will be a new extension built over the existing ground floor single storey extension and a new second floor within the new roof space. The existing ground floor space will remain as commercial. The local facilities are more than sufficient to accommodate the potentially slight increase in occupancy. The first floor has not been occupied for many years and therefore public services and local business would benefit from an increase in the populous.

The proposed bedrooms will meet current minimum space recommendations for bed and breakfast facilities and all the bedroom will include en-suites.

Minimum standard recommendations as below:

10.3 square metres for a twin bed room

8.4 square metres for a double room

5.6 square metres for a single room.

Proposed bedrooms (Bedroom size excluding en-suites)

Bedrooms 1, 2, 3, 4,5,7,8,9,10,11 & 12 are bigger than 10.3 square metres

Bedrooms 6 & 13 are bigger than 8.4 square metres

Bedrooms 14 is bigger than 5.6 square metres

Layout - Internal

The ground floor is to remain in commercial use. The first floor and second floor layout will accommodate bedrooms with en-suites. All access to the above floors will be separate from the commercial premises. All modification and new construction will be to the latest building regulation taking specific account of the fire, ventilation and acoustic requirements. The new spaces are more than adequately proportioned and provide all the necessary facilities expected within the space. The internal layout proposed utilizes the premises in a safe economic manner and fulfils the requirement for accommodation in the town centre.

Appearance

The building itself dates from the late 19th century and maintains its original brickwork, render and external features. The development will include the proposed extension over the existing single storey extension at the rear, building out the existing recess [see photo 1] on the western elevation and create a new floor within the proposed mansard roof. All work is proposed to maintain the buildings inherent characteristics. The proposed design will help to enhance the rear of the building, which is currently in a dilapidated state and provide better access to the upper floors than the current unsafe timber stairs [see photo 2].

Access

Access to the bedrooms is provided via foot by a new staircase to the rear of the property. There is easy access to public transport, good facilities for walking and cycling.

Parking

There is capacity for 4 car parking on a first come first serve basis. There is also local parking in Arun DC car parks and off-road parking with tickets if required during the day. These spaces are free from 5:00pm - 9:00am.

Summary

In conclusion, this development hopes to take the upper floor of the existing property, that has been unoccupied for many years, and bring it back into use as bed & breakfast. There will be minor enhancements to the external characteristics of the property will take place, including a small extension at the rear and the flat roof is to be converted to a standard pitch. Pedestrian access remains via the existing entrance at the rear off the property leading of Crescent Road. There is a real need for the proposed type of accommodation within the town centre and encouragement is offered by government to bring facilities above commercial premises back into use. This in turn offers a great place for visitors to stay within the town of Bognor Regis. The owners of syrup cafe have other business's in Bognor Regis and have been instrumental in helping to improve the wider townscape. They have also been Chamber of Commerce winners 2018. It is important that investment by business owners within Bognor Regis town is encouraged. Therefore, the business owners of Syrup Cafe, wish to invest further in the town of Bognor Regis by proposing Bed and Breakfast accommodation above their currently thriving cafe business.
