Ref. BR/212/13

Dear Maclan, The plan forwarded as existing elevation to the EAst has only been true for a short time. A great deal of the flintwork has been changed, as can be seen, to accomodate the windows present at the moment; prior to any permission being granted.

The new brick work is a recent change to the E~~x~~elevation possibly to facilitate a change of use to allow residential occupation.

These changes have spoilt the look of an historic building.

Yours faithfully

Dear Madam,

I object to the windows on the east elevation of FLINT HOUSE. The work carried out has ruined this aspect of the building. Too much flint work has been replaced by bricks.

Yours faithfully,

James Cleary
