

of the site is currently a private field, however university building are situated within the south west of the site and another unnamed building is located within the western portion of the site boundary. It is also noted that the site is prone to flooding and does not have any flood defences.

There are no areas of environmentally sensitive designations influencing the site and thus requires no specific and precautionary measures to be undertaken on site. The highest risks are considered to be with made ground deposits encountered under the proposed new school building footprint as well as the existing school grounds.

The development site is approximately 2.2 Hectares and located in an area of dense scrubland and on a flood plane to the north of Bognor Road and west of Felpham Way at National Grid reference 4994414 099634. This is immediately east of the current University Campus. The northern extent of the proposed site is marked by Ladybrook Community Orchard. The maximum level of the site is in the west (approximately 4.0m above Ordnance Datum) and the site slopes down to the minimum level in the south east corner of the site (approximately 1.0 m above Ordnance Datum)

The properties immediately surrounding the University Campus comprise semi-detached houses. The main University buildings are situated to the west of the proposed site, with halls of residence beyond the western boundary. There are recreational sports fields covering the northern section of the proposed site and a derelict field (Donkey field) in the south region of the site.

1.3 Timing of the Works

Contract Award Date	TBA
Contract Commencement Date	September 2016
Contract Period	TBA
Site Start Date	10 th October 2016
Planned Contract Completion	April 2018
Form F10 (Rev) Date Submitted (copy of F10 filed in Appendix 5)	TBA

- (a) A construction programme specific to the project will be maintained by the project team this will be updated / reviewed throughout the works and copies provided to the client or others requesting this information
- (b) The normal hours of work are as follows:
- Monday to Friday: 08.00 – 18.00
 Saturday: 08.00 – 13.00
 Sunday: N/A
- (c) The site will be continually monitored by the site project team and in addition advice, support and monitoring will be provided by one of the Galliford Try independent Health, Safety and Sustainability Advisors.

The HS&S Advisor that has been appointed for this project is:

Name: Andy Turrell

Qualifications: NVQ4 Occupational Health & Safety / NEBOSH Diploma

Telephone No: 07484 041602

Frequency of Visits: frequency of visits as agreed with Regional HS&E Manager
