**From** Joanne Lewis <Joanne.Lewis@arun.gov.uk>**Date** Tue 02/11/2021 12:57**To** Maria Tomalova <Maria.Tomalova@arun.gov.uk>

Hi Maria

The submitted emissions report doesn't answer my questions relating to whether or not they will need a permit for the spraying activity and therefore whether the stack will be acceptable. If this is the equipment they plan to install then this document may assist in proving compliance with a permit but at the current time I don't know if they will require a permit and if they do under what section of the legislation. I need to know what paints or products they are planning to spray and on to what materials and an estimate as to what quantities of paint will be used in order to determine whether the stack height applied for will be acceptable. Without this information the applicants run the risk of being granted planning permission for a stack and potentially installing one which is not able to comply with a permit and then having to re-apply for a different proposal with the delays and added costs associated with this.

My original comments therefore remain in place as follows;

In order to ensure that the stack heights applied for will be suitable should a permit be required, **more information should be provided on the type and quantity of paints that are proposed to be used in the spray booth and what materials and products they are being applied to.** The applicant should review the process guidance note relevant to their business for further information on permit requirements (most likely under the solvents section) and the relevant note should be referred to in the extra information submitted. [Local Air Pollution Prevention and Control \(LAPPC\): process guidance notes - GOV.UK \(www.gov.uk\)](#)

Joanne

Please note that I work part time, usually between 09.30 and 14.45 Tuesday – Friday.

Hi Joanne,

Please see attached with regards to your comments on the above application.  
I have re-consulted EH.

Kind regards

Maria

Good morning Maria

Have attached a stack testing emissions report received this morning on an almost identical spray plant equipment package for your attention. We trust this meets the Environmental Health requirements as supplied by the spray plant / booth manufacturers.

Please advise if anything else is required

Many thanks

Kind regards

Richard

Good morning Maria

Thank you for your communication

Have forwarded your enquiry from the Environmental Health on to my client for their urgent attention.

The contact dealing with the whole project is away till the 21<sup>st</sup> Oct but have included another senior management member to hopefully commence some action in the meantime – will get back to you as soon as I get their response as know that they would wish to proceed correctly and urgently with the application.

Many thanks

Kind regards

Richard

Dear Mr Hollands,

Please see below Environmental Health comments:

I refer to the above application and request that further information is provided in order for Environmental Health

to make a decision on whether or not to object to the application or request certain conditions.

- The use of paint spray booths may require a permit under the Environmental Permitting Regulations 2016 depending on the type and quantity of paints or products to be used. If a permit is required this may dictate the stack heights in order to allow for adequate dispersion. In order to ensure that the stack heights applied for will be suitable should a permit be required, more information should be provided on the type and quantity of paints that are proposed to be used in the spray booth and what materials and products they are being applied to. The applicant may wish to review the process guidance note relevant to their business for further information on permit requirements (most likely under the solvents section) and the relevant note should be referred to in the extra information submitted. Local Air Pollution Prevention and Control (LAPPC): process guidance notes - GOV.UK ([www.gov.uk](http://www.gov.uk))

- If a permit is required it is advisable for the planning application and permit application to be considered at the same time to ensure that all requirements of both legislative regimes can be met and to avoid unnecessary expenses and delays.

**Noise**

It is possible that a full noise assessment may be required given the existence of residential properties on Ash Grove.

An important factor in determining whether this is required is the proposed operating hours. The applicant should

therefore provide information on the proposed operating hours of the spray booth. If it is to operate at night this

has more potential for noise disturbance.

If you want address the above comments, please provide further information within 2 weeks from the date of this email.

Kind regards

Maria
