

BIN STORAGE AND COLLECTION STATEMENT

Bin Storage:

A bin store will be created in the existing rear store area. This will be divided into two sections, general waste and recyclable waste.

Each flat will have a separate 240 litre wheelie bin for normal waste and recyclable waste.

Collection:

Wheelie bins will be put on the back edge of the pavement, next to the building, on the morning of the refuse collection and empty bins returned to the store as soon as practical.
