Subject: LYON STREET

Dear Stuart,

Further to our meeting earlier this week I respond as follows:

The items that we will be storing are (dry storage) flat pack cardboard boxes, boxes of polythene bags used for vacuum packing, protective clothing, spare metal hooks and plastic trays.

Vehicle movements would be once or twice per week. Keeping any activity at the premises down to a minimum.

As discussed with Yourself earlier in the week the application is to demolish the existing two old garages to be replaced by one low level dry storage facility.

Previously I had sent existing plans at the beginning of August into yourselves. I will resend them over again.

Kind regards

Chris
