5. Identification of Tree(s) and Description of Works

Please identify the tree(s) and provide a full and clear specification of the works you want to carry out.

You might find it useful to contact an arborist (tree surgeon) for help with defining appropriate work.

Where trees are protected by a Tree Preservation Order, please number them as shown in the First Schedule to the Tree Preservation Order where this is available. You should use the same numbering on your sketch plan (see help for sketch plan requirements).

Please provide the following information:

- Tree species
- The number used on the sketch plan); and
- A description of the proposed works.

Where trees are protected by a Tree Preservation Order you must also provide:

- Reasons for the work; and where trees are being felled
- Proposals for planting replacement trees (including quantity, species, position and size) or reasons for not wanting to replant.

e.g. Oak (T3) - fell because of excessive shading and low amenity value. Replant with one standard ash in same position.

Crown reduction of 1No Quercus Robur (English Oak).
Current approx. height is 20m and approx. spread is 10m.
Proposal to reduce crown by 2m all round to reduce spread to 8m and height to 18m.
Tree has shown evidence of instability in recent years with a large lower limb failure in 2020 and another middle limb failure in 2021.
Many large tree limbs are now within 0.5m of the residential buildings of 262 Hawthorn Road and also the garage of 252 Hawthorn Road. No damage has occurred to the buildings to date but it is reasonable to assume it may occur in the near future.
Overall the tree appears in a broadly healthy condition but could benefit from a crown reduction as indicated to assist with the future health and vitality of the tree and keep it in harmony with its surroundings.
All pruning would be carried out in accordance with BS3998:2010
