Proposed replacement launching ramp at Bognor Regis Yacht Club

Please find attached our planning application for a replacement launching ramp on the beach adjacent to our Club – the original ramp is now buried under tons of shingle.

We have the support of local councilors for this project and have received grants from Sport England's Inspired Facilities Fund and Bognor Regis Town Council towards the cost.

This ramp will provide a much needed facility, not just for our Club, but also for pedestrian access over the pebbles and down to the sandy beach.

This improved access will make a vast improvement to the operation of our Club. We run RYA training courses for dinghies, catamarans and safety boats, liaising with local schools for youth courses as part of the RYA OnBoard initiative.

Our safety boats are crewed by qualified helms whenever there is racing or training activity on the water.

Please advise if there is any further information required.
