In response to the query from the Landscape Officer regarding the heights of the plants and trees to be planted and the recent further information provided, I would suggest the following as a realistic approach to the heights of the plants and trees to be planted:-

TREES :-

In order to comply with the British Standard for Nursery Stock sizes, the trees will be 6-8cm or 8-10 cm girth (Approximate height 2.5M) light standard trees

- A. 1 no. Prunus/Cherry - Approximate height 2.5M.
- B. 1 no. Fagus/Beech - Approximate height 2.5M.
- C. 1 no. Acer Palmatum/Japanese Maple - Approximate height 2.5M.
- D. 1 no. Sorbus/Mountain Ash - Approximate height 2.5M.
- E. 4 no. Crataegus/Hawthorn - Approximate height 2.5M.

SHRUBS :-

As mentioned these would most probably a 5lt stock size.

- F. 5 no. Ligustrum Japonicum/Variiegated Chinese Privet - Approximate height 0.5M.
- G. 18 no. Prunus Laurocerasus/ Cherry Laurel - Approximate height 0.5M.

Hawthorn Hedgerow - Approximate height 0.5M. Approximately 35 of the Hawthorn Hedgerow plants would be required

Best wishes,

Michael.
