Subject: RE: BR/281/18/PL 99 Victoria Drive, redevelopment with flats

Dear Simon

I refer to your email of earlier today in respect of the above.

The applicant has confirmed to me his acceptance of the requested extension of time, which will allow a decision to be made on or before 8 March 2019.

In addition, the applicant has confirmed that he also agrees to the suggested wording of the two pre-commencement conditions detailed in your email.

I trust that this information is of assistance.

Best regards,

TIM RODWAY

Subject: BR/281/18/PL 99 Victoria Drive, redevelopment with flats

Dear Tim,

I am presently writing this report up for our 6th March Committee. Can you therefore agree an extension of Time until 8th March.

Separately I need to agree pre-commencement conditions with you. I am required to give you up to 10 working days before a decision. There are currently two proposed, as follows:

1. Standard Drainage Condition requested by our Engineer -

Development shall not commence until full details of the proposed surface water drainage scheme have been submitted to and approved in writing by the Local Planning Authority.

The design should follow the hierarchy of preference for different types of surface water drainage disposal systems as set out in Approved Document H of the Building Regulations, the recommendations of the SUDS Manual produced by CIRIA.

Winter groundwater monitoring to establish highest annual ground water levels and Percolation testing to BRE 365, or similar approved, will be required to support the design of any Infiltration drainage.

No building shall be occupied until the complete surface water drainage system serving the property has been implemented in accordance with the agreed details and the details so agreed shall be maintained in good working order in perpetuity.

Reason: To ensure that the proposed development is satisfactorily drained in accordance with policies W SP1, W DM1, W DM2 and W DM3 of the Arun Local Plan. This is required to be a pre-commencement condition because it is necessary to implement the surface water drainage system prior to commencing any building works.

2. Standard Construction Management Plan condition requested by WSCC -

No development shall commence until a Construction Management Plan has been submitted to and approved in writing by the Local Planning Authority. Thereafter the approved Plan shall be implemented and adhered to throughout the entire construction period. The Plan shall provide details as appropriate but not necessarily be restricted to the following matters,

- the anticipated number, frequency and types of vehicles used during construction,*
- the method of access and routing of vehicles during construction,*
- the parking of vehicles by site operatives and visitors,*
- the loading and unloading of plant, materials and waste,*
- the storage of plant and materials used in construction of the development,*
- the erection and maintenance of security hoarding,*
- the provision of wheel washing facilities and other works required to mitigate the impact of construction upon the public highway (including the provision of temporary Traffic Regulation Orders),*
- details of public engagement both prior to and during construction works.*

Reason: In the interests of highway safety and the amenities of the area in accordance with policies D DM1 and T SP1 of the Arun Local Plan and the National Planning Policy Framework. This is required to be a pre-commencement condition because it is necessary to have the site set-up agreed prior to access by construction traffic.

I am currently awaiting the final comments of our Tree Officer but am proceeding to write the report on the basis that he will respond with conditions. It may be that he requests an additional PC condition and I will have to seek your agreement to that when/if it is requested.

Can you advise if you agree to the PC conditions and also the Extension of Time.

Kind Regards
