TREE REPORT

Re: Oak

The Oak tree is located on the boundary of number 9 Pevensey road and the Bognor allotments off Amberly drive, the tree is approx 30 - 35ft tall with a mature crown. The tree is in good health and showing good growth over the entire crown. Previous crown lifting on the northern side has left the stem unbalanced and weighted to the south, epicormic growth is thick on the lower stem and Ivy is rapidly moving into the upper canopy.

Recommendation;

Crown lift south side to even and rebalance. Reduce entire crown to maintain good shape and allow light into property. Thin epicormic growth and remove ivy from upper crown to height of hedge beneath.

This is a visual report on the trees current situation; I accept no responsibility for the trees.

Regards,

Nick Wilson.
