Design and access statement

The design principle as shown on the previously enclosed photographs was to demonstrate the benefits of the products we are selling and make the public more aware. The latest health and governmental statistics appear to want to inspire the general public into promoting a more health conscious society, to look at weight issues, diabetes and other deficiencies that exist and cost the NHS.

Therefore the area we are using for display is to promote health issues to the public and as this area has previously been sign written we assumed this met Council approval and we were looking to repeat this promotional area but with large promotional illustrations rather than words.

We have received no complaints from the public
