Hi Simon

Apologies, yes, nothing further needed.

Anna

Hi Anna,

They are not applying to discharge the condition. Do you mean instead that you are happy and need no further conditions or similar?

Kind Regards

Simon, good afternoon.

Attached is an email from the acoustic consultant (who prepared the original 2016 report) providing confirmation that his conclusions do not change. That is, the minor amendments to the flume height and the rapid river design proposed by this application will have no adverse impact on the acoustic environment.

Please let me know if you require anything further.

Kind regards,

Tom Edmunds

Dear Tom,

Please see comment below from Environmental Health. Can you advise re whether the amendments to the flume height and the rapid river design will have any adverse impact on the acoustic environment.

Kind Regards

Dear Simon

BR/39/19/PL - Application for Variation of Conditions following the grant of Planning Permission BR/240/16/PL relating to Condition 2 & Planning Permission BR/331/17/PL relating to condition 1 - approved plans

I note from the covering letter submitted with the application that it includes amendments to reduce the height of the flume, adjustments to the design of the rapid river and addition of louvres. They have stated that the louvres will have no impact on the acoustic performance of the building. However, I would request that the applicants also ask their acoustic consultant to confirm that the amendments to the flume height and the rapid river design will have no adverse impact on the acoustic environment. If this is the case then environmental health would have no objection to the amendments.

Kind regards

Anna Appleton
