POLICY COMMENTARY

ADVERT

The above policies combine to describe the criteria against which the application will be assessed particularly with regard to visual amenity, aural amenity, public safety, quality of the environment and impact upon the character of the local area.

DEVELOPMENT PLAN AND/OR LEGISLATIVE BACKGROUND

ADVERTS

Regulation 3(1)(a)(b), 3(2)(a)(b) and 4(3) of the Town and Country Planning (Control of Advertisements) Regulations 2007 states:-

"3(1) A local planning authority shall exercise its powers under these Regulations in the interests of amenity and public safety, taking into account -

- (a) The provision of the development plan, so far as they are material; and
- (b) Any other relevant factors.

(2) Without prejudice to the generality of paragraph (1)(b) -

(a) Factors relevant to amenity include the general characteristics of the locality, including the presence of any feature of historic, architectural, cultural or similar interest;

(b) Factors relevant to public safety include -

(i) The safety of persons using any highway, railway, waterway, dock, harbour or aerodrome (civil or military);

(ii) Whether the display of the advertisement in question is likely to obscure or hinder the ready interpretation of any traffic sign, railway sign or aid to navigation by water or air;

(iii) Whether the display of the advertisement in question is likely to hinder the operation of any device used for the purpose of security or surveillance or for measuring the speed of any vehicle.

4(3) In determining an application for consent for the display of advertisements, the local planning authority may have regard to any material change in circumstances likely to occur within the period for which the consent is requested.

OTHER MATERIAL CONSIDERATIONS

It is considered that there are no other material considerations to warrant a decision otherwise than in accordance with the Development Plan and/or legislative background.

CONCLUSIONS

The proposal seeks retrospective consent for the provision of 11no. signs located on the 'click & collect' structure, or on the drive through barrier. All are non-illuminated.

The structure is nearly completely covered with advertisements, but given the structures location within the Tesco car park, near the back section of the car park, it will not be readily viewed from the public outside of the site and the signs are non illuminated. Neither will the signs have any detrimental effects on highway safety. The boldness of the advertisements on the structure will make it highly visible to users of the Tesco car park and the 'click & collect' structure, thereby clearly directing customers to the correct location.

It is therefore recommended that the application be granted consent for the following conditions.
