Mrs Chapman

Further to our conversations yesterday and today please find attached our revised drawing (revision B) to be substituted for the currently lodged drawing. (revision A)

As you will see we have reduced the size of the two rear facing windows from the master bedroom at first floor to reduce the impact of the proposed extension on the neighbouring properties in terms of protecting their privacy in the rear gardens.

I trust the proposals as revised are such that you will now be able to write up your report with a view to recommending that the application is approved but should you have any further concerns please let me know.

We are happy that should further time be required to formally determine the application that an extension of time be granted.

Regards

Leon Odell
