MATERIALS SCHEDULE

Please note many materials displayed here can be submitted as physical samples on request.

Flat Roof: Single ply membrane - Approved installers

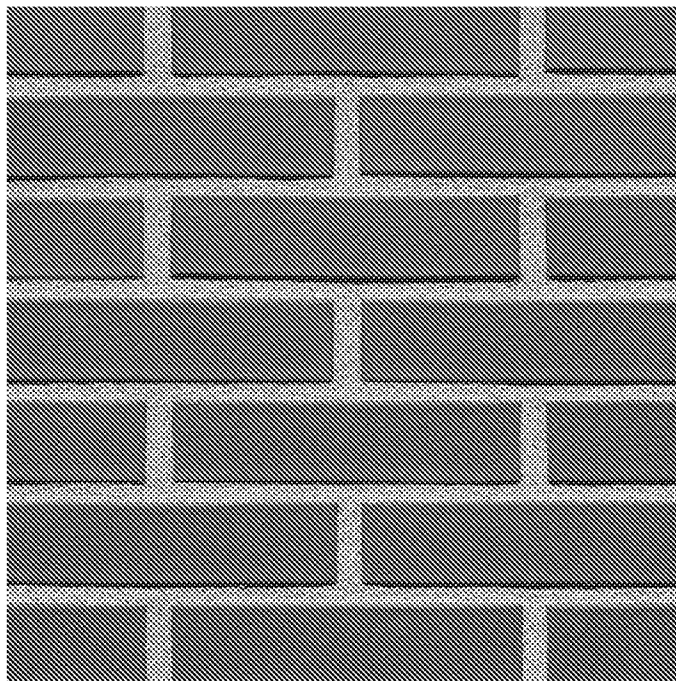

PULLEN

ARCHITECTURE

Wall finish render: Sand Cement render to match existing

Wall finish brick: Dark brick_ Avenue Smooth Black Wienerberger or similar below
render/cladding/dpc level

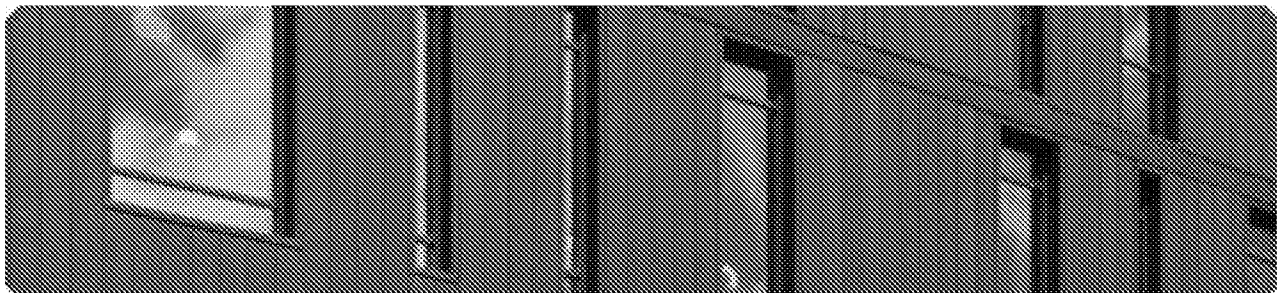

PULLEN

ARCHITECTURE

Wall finish cedar cladding: Cedar can be left untreated but it also takes paints and stains extremely well. It is also an excellent material for thermal insulation – in summer keeping the building cool and in winter preventing the heat from escaping.

Wall finish Zinc cladding: VM Zinc Flat Lock dark grey displayed below.

PULLEN

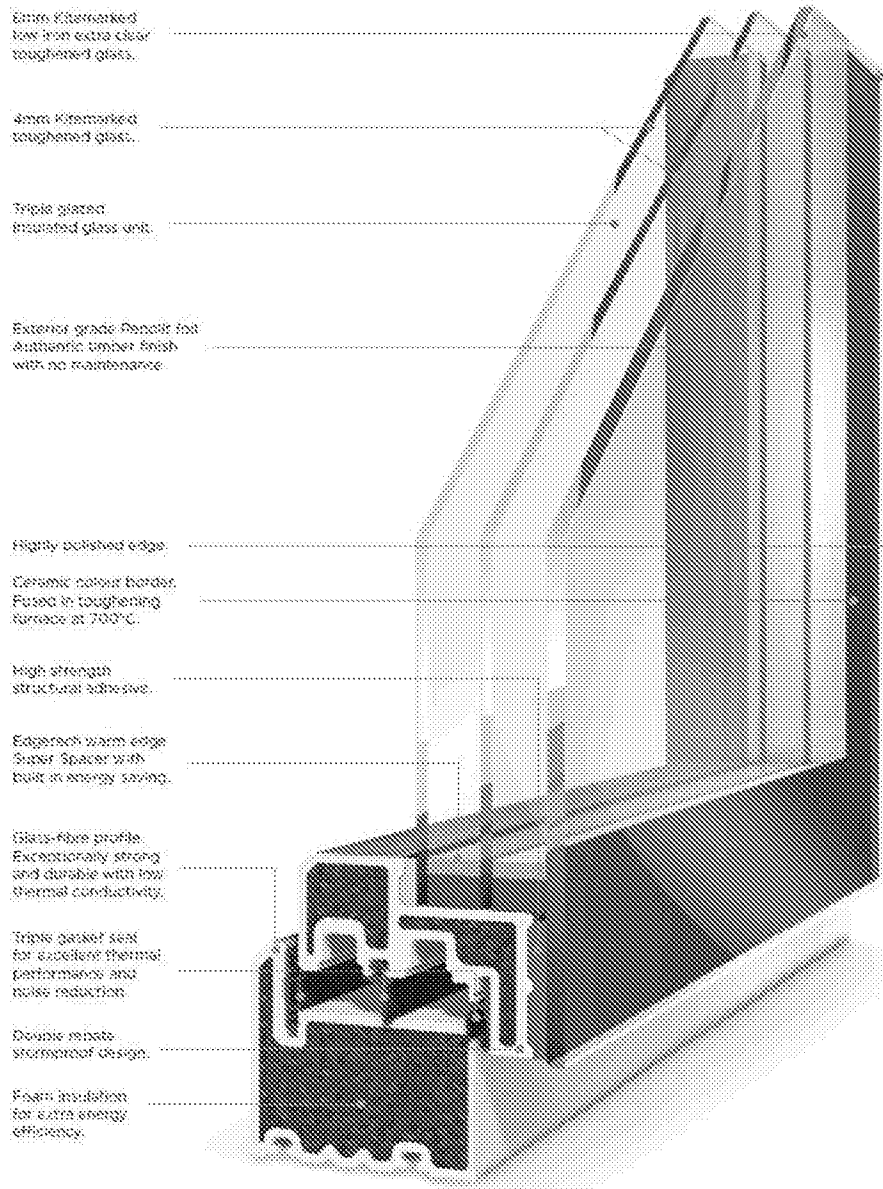

ARCHITECTURE

Windows and Doors: Anthracite grey (RAL 7016) polyester powder coated aluminium trim frame and double glazed compliant to part L and Q of the building regulations.

Example for door frames

PULLEN ARCHITECTURE

The 50mm triple glazing is made from 6-4-4 toughened glass, insulating the home against both cold and noise. The flush glazing completely hides the glass-fibre double rebate stormproof frame, offering exceptional U-values and unparalleled weather protection. We can also supply this triple glazed unit with two panes of low emissivity glass filled with argon gas for enhanced energy efficiency.
