

Please upload as consultation for BR/49/20/DOC

Thanks

Hi Amber,

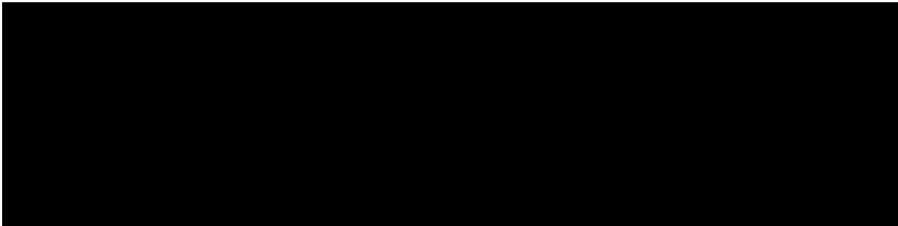

Thanks for this – in general the materials appear to be acceptable. However, I do have two comments:

Cedar: I note in the materials schedule that it states 'Cedar can be left untreated but it also takes paints and stains extremely well. However, it is not particularly clear how the applicant intends of treating the cedar – should this be confirmed?

Windows: I note that the planning application identified that the proposed windows would be of timber construction. The proposed ones appear include a polyester powder coated aluminium trim frame. However, on balance, the proposed windows would appear to be acceptable in this instance.

Kind Regards

Martyn

Hi

I have a DOC for Culver Cottage for the materials for the side extension.

The application expires on the 24th and I've discussed it with Dan. Just to let you know we are happy with it and will be approving unless we have comments from you stating otherwise.

Thanks

Amber
