Subject: planning application number BR/63/19/PL

Dear Sirs,

I object to the above planning application as it appears to get rid of the layby which is always busy. If the lay by is removed then cars will park on the pavement which is then a danger to pedestrians especially if they are pushing a pram/pushchair. It would then be difficult to pass the parked cars on the pavement without going into the road. With no layby then at the end of the cul de sac, which is already busy, no emergency vehicles can access that end of the road.

A development of just two blocks of semi detached houses would be better as the layby could then stay in situ and the parking spaces which are already at each end of the building at present could still be used for parking and would be big enough for the properties to have two parking spaces each.

Also I object to the bay windows on the proposed build as they are not in keeping with the other properties in Kew Gardens.

Yours faithfully
Mrs S J Foreman
