Planning Application:.....BB/165/11/1.T

Dear Sir/Madam

The West Sussex Wildlife Protection Group opposes the planning application above.

Reasons are as follows:.....no felling unless
dead or dangerous.....

Would you please note that any felling of trees, lopping, tree surgery, ground clearance or any activity involving nesting birds during the months between April to September contravenes the Wildlife and Countryside Act of 1981 and 1985 especially if protected species are involved, also if there is any earthwork involving mammals then the Wild Mammals Act 1996 would be contravened leading to Police prosecutions.

Please contact above group for legal advice and site survey.

Yours Sincerely

Jaine Wild
Secretary

Subject: felling of trees 1&2 Glamis street article 13 Ref BR/65/11/T

Dear Karl Roberts (Ref BR/65/11/T)

I wish to object to the felling of any trees in Glamis St. I do not object to professional tree surgery reduction by 25% being actioned. It has been very heartening to see No 1 being renovated however I believe the property is owned by a commercial company renovated for letting. To fell any trees in Glamis St would be unacceptable as they are part of the old Hotham estate and they make Glamis street charactful, an oasis in the town and very pleasant for residents. I have the original plans of my house and I believe there would also be references at the Bognor museum. I viewed some photographs in the summer of my house at the turn of the century and the trees were evident.

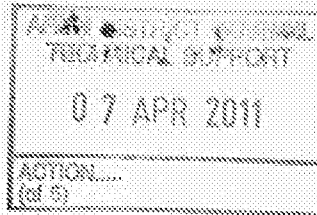

Regards
Noola (GJA Thorp-Noola Delany)

Re Planning Application BR/65/11/T : Tree Surgery

Att of J.Chapman Case Officer

ACK

Dear Mr.Chapman,

In respect of the above application, may I add my complete support for the remedial works so proposed. My property adjoins the relevant site, and the trees in question are a total nightmare.

I have owned my property for something approaching 30 years, and in this period, no attempt has been made to control the growth, by the previous owners. I was dismayed to learn of the TPO when it came about, having known nothing about such being considered, or my feelings would have been made well known to your TPO department.

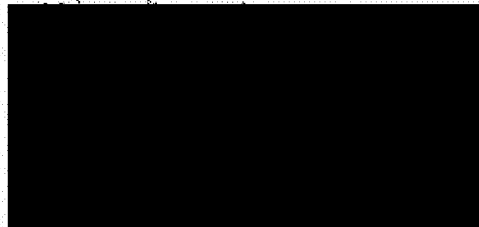

The canopy from the trees has grown across my drive and parking area over the years, until the TPO was introduced I did cut back offending limbs as at one stage when in full leaf, one could not drive into my property without the branches scratching the car roof.

The limbs have grown towards my property and in fact are in contact with the structure. When in full leaf, light is very much restricted to my property, and Tenants have had good reason for complaint in the past. The residue from the Lime trees is an utter bane of all car owners using the property, including myself, as the sticky residue falls onto the vehicle in a matter of minutes, and is very difficult to remove if left for any time. In a couple of weeks, in a Tenant is on holiday, their car looks a complete mess.

I have the thankless task of clearing my driveway in the Autumn of something approaching 50 plus large bags of leaves, from trees which I do not own!! This is to keep my driveway safe for the Tenants, as wet leaves are a potential hazard, and to attempt to keep my property in good order.

A number of the trees also suffer from decay, and in any wind, innumerable branches fall onto my driveway, posing a Health and Safety hazard to the occupants of my property. The roots have also broken up my concrete driveway.

I trust that common sense will ensure that the application is successful, and I very much look forward to the benefit which the surgery will bring to myself and my Tenants.

R. Woolley
