Maltravers Road,
Littlehampton,
West Sussex.
BN17 5LF.

Dear Ms. Myer,

Re: Biodiversity Statement.

Further to our exchange of emails recently I confirm the following as statement to accompany this application.

To accompany this application, and in addition to the already extensive ecological measures that the University is and has undertaken to accompany various initiatives with previous developments the University is intending to install further measures such as bat boxes, hedgehog nesting boxes and additional bird boxes to promote further natural inclusion on to our Bognor Regis site. Already in place are nesting boxes and log stumps with a vast 'wild' garden area. The measures proposed here are to enhance these previous measures. It is also intended to leave the natural areas as such to promote insects and alike to the vicinity.

An accompanying Biodiversity Enhancement Plan is attached to this letter for clarity.

I trust that this satisfies your criteria but if there is anything further please contact in the usual way.

Yours sincerely,

Keith Blow BSc(Hons), FRICS, FCIQB, FB.Eng.
Senior Estates Surveyor.
