

Application to fell two trees at Burpham Farm House

The two pine trees were planted more than thirty years ago within one metre of the wall of our neighbours house Splash Farm Barn. The trees are now in excess of thirty metres tall and their branches are over the roof of the Barn. The trees are also too big for this small corner of our garden. We will not replace them with trees because of the proximity of the Barn, but will replace them with smaller shrubs suitable to the location.
