Dear Mr Baeza

Further to my letter of 13th May received by you on 17th May, I have noted the amendment to the above planning application.

Please note that all of our concerns still remain and we would like to stress our continued objection to the proposed development on all of the grounds we have previously raised.

The impact on our elderly mother who is finding this project overwhelmingly worrying is unfair, especially as it is difficult for her to understand how to make sure her concerns are taken seriously. As mentioned before, she is a vulnerable person who is now more or less housebound so she will have no escape from the impact of this development both during and after the building process. Her security and safety are of paramount importance and this development will therefore have a huge impact on her and will also certainly reduce the privacy that is so vital to her enjoyment of her home.

Your sincerely

Elizabeth Harsant, Susan Hegarty and Pamela Harsant
