Hi Anita

I am aware that there have been many objections in relation to the proposed regularisation of the hours to allow 24/7 use of the application site. However, the application has been made primarily to address noise complaints made by local residents and the acoustic consultant employed by the applicants has proposed a scheme of works and actions that will reduce the noise levels to those recommended in relevant noise guidelines. As a result, providing the conditions set out in the acoustic report are applied and adhered to the impact from noise will be significantly reduced.

There will still be some noise from this and other sites on the industrial estate and restricting the hours will prevent any noise from the application site during these hours but as stated the measures indicated by the acoustic consultant will bring the noise levels from activities at the application site in line with relevant guidelines.

Should you have any further queries please do not hesitate to contact me.

Regards

Anna

Hi Anna,

Further to your response regarding the above application can you let me know if you have any concerns regarding the 24 hour, 7 days a week operating hours?

Thanks

Anita
