

0.814m3 flooding in the 1in100 year +45% allowance for climate change event. All flooding will be contained within the highway. The flood flow analysis does not account for the kerb heights.

3.914m³ flooding in the 1in100 year +45% allowance for climate change event. All flooding will be contained within the highway. The flood flow analysis does not account for the kerb heights, at the end of the parking court there is a 100mm kerb upstand. The area covered before reaching the southern kerb is approximately 98m², therefore the exceedance flows will be contained within the highway.

Depth < (mm)	Hazard Rating <	Lower Colour	Upper Colour
10	0.00	Not Drawn	
100	0.75		
300	1.50		
600	2.50
