

APPENDIX C

Phase 1 Desk Study – Historical Mapping

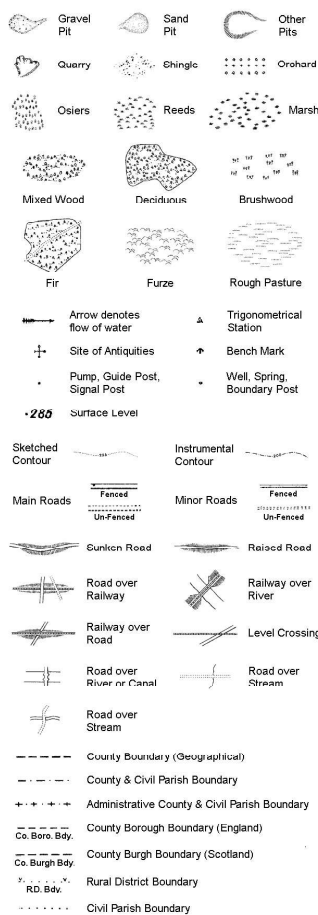

Historical Ordnance Survey Map Interpretation				
Date	Scale	Features On Site	Features Off Site	Significant Potential Contamination Sources
1876	1:2,500	The majority of the site is located in the SE corner of a single field, with a small portion extending into the neighbouring field to the south.	A track is present to the immediate north and east of the site, with fields beyond. Further fields are present to the south and west. Approx. 120m S of the site an E to W flowing stream (Ryebank Rife) is shown. A property, with a well, is shown approx. 190m N of the site, on the junction of the track from the site with the E-W aligned Grevatt's Lane. A second property is shown approx. 260m NW of the site immediately N of Grevatt's Lane.	
1898	1:2,500	No changes.	A building 'Hobb's New Barn' is present approx. 30m east of the NE corner of the site. A pump is indicated at building. The property N of Grevatt's Lane is identified as 'Westground Barn'.	
1912	1:2,500	No changes.	A drain, flowing to S, is indicated approx. 175 W of the site, along an existing N-S field boundary.	
1933-37	1:2,500	Former field division no longer shown.	A strip of deciduous trees approx. 15m wide is shown to the east of the track from the site to Grevatt's Lane and extends to the SW from 'Hobb's New Barn'. There has been some consolidation of the fields to the west of the site.	
1947 Aerial photo	1:10,560	No significant changes.	No significant changes.	
1962-67	1:10,000	No significant changes.	Grevatt's Lane has been widened and re-aligned to straighten it. The property and well by the junction of the track from the site with Grevatt's Lane is no longer shown.	
1974	1:2,500	No significant changes.	A drain (Elmer Rife), flowing S to Ryebank Rife, is indicated between the site and the strip of woodland to the E of the site. There has been consolidation of various smaller fields to the east and south of the site.	
1980-82	1:10,000	A large structure approx. 20 by 60m is shown on eastern part of the site.	No significant changes.	
1992-93	1:10,000	No significant changes.	Three structures (approx. dimensions 10 by 40m, 8 by 14m and 12 by 21m) are present immediately S of the site.	
1999 Aerial photo	1:2,500	The western portion of the site appears to be bare soil, with a stack of straw bales.	Three elongate structures (poultry sheds?) (approx. dimensions 20ft 5 by 100m, 10ft	

Historical Ordnance Survey Map Interpretation				
Date	Scale	Features On Site	Features Off Site	Significant Potential Contamination Sources
			5 by 40m) are visible immediately S of the site. The field to the W has been divided with a strip (approx. 12 by 450m) of shrubs/tress present, extending to SW of the site towards Grevatt's Lane. The fields to the W, E and immediately SW of the site appear to contain unharvested arable crops.	
2000	1:10,000	No significant changes.	No significant changes.	
2006	1:10,000	No significant changes.	No significant changes.	
2025	1:10,000	No significant changes.	The various agricultural structures immediately S of the site have been replaced by a single large (industrial) building. Four (industrial) buildings are present to the N of the Site.	

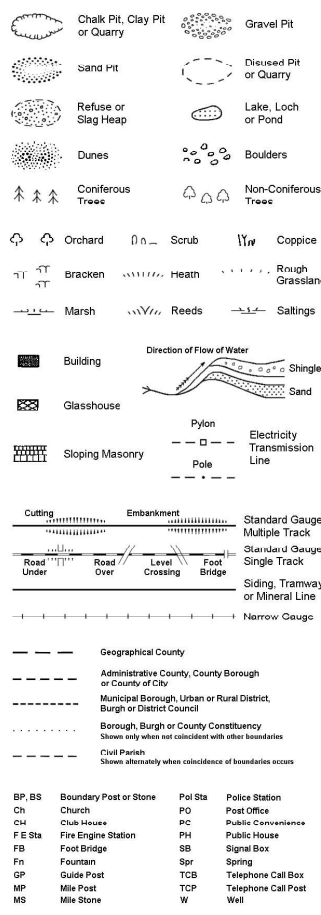

NOTE: Additional maps at 1:10,560 and 1:10000 scale of similar age have been obtained. These maps are appended but do not provide much additional information.

Sussex

Published 1879 - 1880

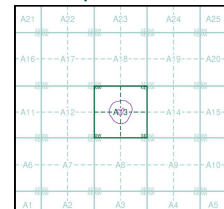

Source map scale - 1:10,560

The historical maps shown were reproduced from maps predominantly held at the scale adopted for England, Wales and Scotland in the 1840's. In 1854 the 1:2,500 scale was adopted for mapping urban areas; these maps were used to update the 1:10,560 maps. The published date given therefore is often some years later than the surveyed date. Before 1938, all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas. In the late 1940's, a Provisional Edition was produced, which updated the 1:10,560 mapping from a number of sources. The maps appear unfinished - with all military camps and other strategic sites removed. These maps were initially overprinted with the National Grid. In 1970, the first 1:10,000 maps were produced using the Transverse Mercator Projection. The revision process continued until recently, with new editions appearing every 10 years or so for urban areas.

Historical Aerial Photography
Published 1947
Source map scale - 1:10,560

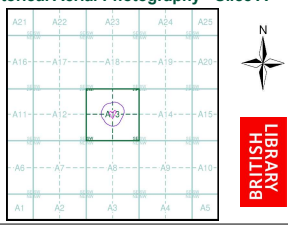

The Historical Aerial Photos were produced by the Ordnance Survey at a scale of 1:1,250 and 1:10,560 from Air Force photography. They were produced between 1944 and 1951 as an interim measure, pending preparation of conventional mapping, due to post war resource shortages. New security measures in the 1950's meant that every photograph was re-checked for potentially unsafe information with security sites replaced by fake fields or clouds. The original editions were withdrawn and only later made available after a period of fifty years although due to the accuracy of the editing, without viewing both revisions it is not easy to spot the edits. Where available Landmark have included both revisions.
