CM/1/17/OUT
Looking again at the plan to move the roundabout and the road layout it appears the estate is in danger of becoming a rat run for the already excessive traffic , including the increased capacity of lorries to the recycling plant and proposed energy production facility. The report states that due to predicted noise levels above the acceptable norm houses will be built without the capacity to open their windows and alternative methods of ventilation used. What a pity that in a country area an inner city solution is to be introduced.
The report talks up local support for the plan. do not forget that this was in response to a 140 house proposal – which has now more than doubled. I think this is being economical with the truth
