Subject: CM/1/17/OUT - Noise

Dear Claire

You will recall there was one remaining matter that ADC Environmental Health had asked for clarification from us on – namely

"Please could a map showing the external noise contour levels at ground level with the bund/fence mitigation taken into account be provided? This would also show the noise levels at pedestrian access points." (see Fiona's email of 15th June).

In response, please find attached the calculated noise contour plot at 1.5m height. The contours show that, with the proposed barrier construction in place, noise levels within gardens along the southern edge of the development are expected to remain below 55 dB LAeq,16hr.

Regards

Chris
