Subject: Application CM/1/17/OUT

Dear Councillor

With this letter I would like to urge you, the Development Control Committee, please NOT to grant planning permission on application CM/1/17/OUT, which is the land West of Church Lane and South of Horsemere Green Lane in Clymping, West Sussex.

We live in the beautiful village of Clymping and are heartbroken at the aspect of our lovely village possibly doubling in size! The possibility of this happening leaves us in a complete state of shock and sadness. The pure size of this development is completely out of proportion and will change the character of this village for ever. I always thought that proportionate growth was the way forward?

Clymping is not attached to any other built up areas, so this enormous development will literally be built in the middle of nowhere. This will mean that it brings nothing to the village apart from huge amounts of traffic and population on already grossly overstretched roads and facilities. This field is currently Grade 1 & 2 listed farmland on which crops are actively grown, it is alarming to think that it is possible to cover up perfectly good soil with concrete when many brown field sites are still available.

The most alarming prospect is the fact that the floodgates seemed to have been opened to just build on beautiful green fields in this area. What will remain of our beautiful English countryside if all property developers wish to sell their land and concrete it over for massive amounts of money?

I thank you so much for taking the time to read my heartfelt letter and I hope that you can see the desperate negative consequences

that these massive developments are having on the communities that you are so faithfully looking after. Thank you so much.

Yours faithfully

Veyanke Hodson
