Your Ref: CM/20/17/PL

Date: 19th September 2017

Dear Mrs Johnson

In reply to your email 19/9/17 please find answers to your questions or paper work requested

If you refer back to the letter given to Mr J Baeza and yourself on 12th April 17 in connection with this site under your ref: CM/24/16/PL you will find I mention dust a few times,

- 1/ We are a wet cast products manufacturing operation, so we do not create lots of dust like a dry cast operation would.
- 2/ We manufacture all our products to size so we do not use saws ect to cut any of our products, so don't make any dust this way.
- 3/ Any product which is made wrong or broken is put into a skip and removed from site as hardcore
- 4/ Any dust generated from cutting timber for moulds would be done within the building.
- 5/ As I have said before we have worked next to Bailliffs Court Hotel for 18 years so if there had been any problem with dust they would have soon complained.

6/ As for the noise survey we was asked to get a noise survey done at the site we now operate out, not to take into account the new site as well, even through we did go to the new site for a short while and included some notes in the noise survey, if we had known we could have done it all at the same time, which would have saved another extension and more lost time for us.

Please see new notes No/ 6 through to 10

7/ Could you please indicate now if there are any other issues that you require information about, not leave it to the end of this extension

Regards

Mike Watts
