Subject: FW: CM/20/17/PL Concrete Mouldings Noise Report

Hi Anita,

Having read the amended report, I am happy with the mitigation and conclusions and therefore have no further comment on this matter.

Regards

Fiona

Subject: CM/20/17/PL Concrete Mouldings Noise Report

Dear Fiona,

Thank you for taking the time to discuss this project with me this morning.
As discussed, I have updated the report to include a rating level for a full workday.
The calculated rating level, using the highest acoustic character penalty of all the individual activities, is +5dB, indicating a marginal impact. This is driven by the use of the forklifts which are assumed to spend the full duration of their use on the nearest boundary.
Although audible, the sound of the forklifts are not expected to be subjectively loud at the receptor and are considered to be in keeping with the existing acoustic character of the area.

I trust that this is of assistance. Please do not hesitate to contact me should you have any queries.

Kind Regards

Steven Liddell
