Dear Mrs Gardner,

The water pipe network will be temporary and we will run the blue plastic pipes on top of the ground to each pitch, a short wooden post will be driven into the ground to support the Taps. as this is the summer time, the ground will be hard enough to support this without any need for concrete. The whole infrastructure can be dismantled and removed at the end of the season and stored away for the next one. We have excellent water pressure here and

have already tested that this will work. I have a protocol in place to run each of these taps every week, so even if the pitch is not occupied the water is not stagnant in the pipes.

kind regards,
Alison Baird

Dear Ms Baird,

I note in your original letter you stated 'I will install fresh running water taps at each pitch to further reduce any risk of contact between Campers.'

I can't see these indicated on the substitute block plan.

To clarify can you advise if this is still your intention and if so indicate their position on the submitted block plan? Can you also advise what would happen to these taps at the end of each season when the site is not in use for camping?

Regards

Anita Gardner
