

REF: CM/23/06/**SADLERS COTTAGE, CLIMPING.
Mr M. Cretch**

Please find enclosed the site block plan of house and carport at a scale of 1:500 and proposed ground floor plan of carport and lean-to at a scale of 1:50.

The three bay carport is oak-framed set on approximately three bricks on a concrete base. Two bays are completely open whilst the third is separated by 12mm shiplap timber and a pair of wooden doors at the front to secure.

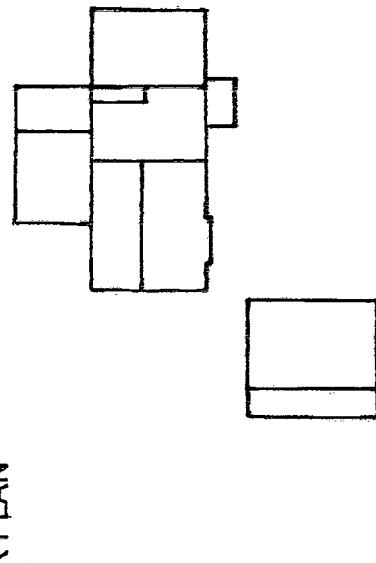

The lean-to at the rear of the carport, to be used for open storage, will simply be a continuation of the roof held up by 100mm sq timbers and again on a concrete base.
