

Kents Yard, Climping

Conversion of buildings to 3no dwellings

Foul Drainage Statement

The existing buildings are not connected to mains drainage and there is no mains drainage in the vicinity of the application site.

As a result, the barns will be connected to a new Klargestar system. However a decision has not been made as to whether they will have one each or there will be a communal system.

Such details will be submitted as part of a building regulations application.

The Klargestar provides a reliable, efficient and environmentally safe solution for sewage disposal needs.
