Dear Mrs Gardner

The pond was excavated in 2018 but has not been finished. It is at present completely dry and will need to be lined with a butyl liner to retain water. The pond contractor has advised that the pond should be at least 2 metres deep in the middle for maximum wildlife and biodiversity benefit. The section shows how the profile will be detailed to ensure rainwater percolation into the ground on the property in the event of a storm.

I hope this clarifies things but please get back to me if you have any further questions.

Best

Jonathan

Dear Mr Bell,

I am trying to determine whether the existing pond is proposed to be altered as part of the proposal. It varies slightly between the pond planting plan and bund planting plan refers to the pond as partially excavated. Please can you clarify. Is the cross section of both existing and proposed depth?

Regards

Anita Gardner
