Mrs. A. Gardiner,
Planning Dept,
Arun district Council
LITTLEHAMPTON.

Dear Mrs. Gardner,

Re: CM/40/19/CLE

I understand that an Application has been made by Mr. Duggan for the continuance of the storage of Containers at the above Site.

As you perhaps know, the trees that were shielding the site were removed by Mr. Duggan, together with my fencing. The resulting detritus was then left, together with an appalling view. The original Planning Permission for the site specified tree screening in order to protect myself and my neighbours, and it was the removal of the trees, together with the verbal abuse I encountered, which led me to complain originally.

I do not have an objection to the site being used for Containers, but I would ask (beg!) that a Condition is imposed that the tree screening is replaced, by Macracarpa which is quick growing and remains as a suitable shield, both visually and for noise reduction. I would hope that the planted trees would be of already a good height.

I try never to be an "Objector" and indeed have no wish to interfere with Mr. Duggans business, but I have had to reduce my horse grazing due to the encroachment of rubbish on my land and I know that my Neighbours are equally concerned by the removal of the original trees.
