

Residential Area Street Lighting

Installation : LED Solar Powered Street Lighting

Project number : TLA/VIV/CVY-R1

Customer : Vivid Solar Street Lighting

Processed by : DJT

Date : 04.04.2022

Project description:

Roads designed to the original standard S4 spec as requested:

Average illuminance between 5 and 7.5 lux.

Minimum illuminance 1 lux.

Pavements designed to the original standard A4 spec as requested:

Average illuminance greater than 1.5 lux

Uniformity greater than 0.15

All posts 6m high.

The following values are based on precise calculations performed on calibrated lamps and luminaires, and their configurations, whereby gradual, unavoidable deviations can occur in practice. All guarantee claims are excluded for the specified data.

This exclusion of liability applies irrespective of the legal grounds for both damages and consequential damages suffered by users and third parties.
