Hi katie please help us make a modal change in how people travel on short journeys thxs
Chris

Letter of objection

Active travel.

Transport plan contains some comment on active travel . New housing estates should now really be focused on providing housing that leads on this agenda otherwise they are not supporting the climate change well being agenda So

Site needs to be designed so that a cycle is as easy to use as a car no more hiding cycles away in a shed in the back garden they must be stored so that they can easily be used

Vouchers should be provided for every house to encourage their use

Cycle routes should have priority at every junction this will help support the new Highway Code

Cycle charging points should be included in the build

All internal routes should link to the national cycle route alongside the a259 the long distance Dover to Plymouth route

A cycle route pamphlet could be produced for each route to show how simple it is to reach local destinations thereby encouraging short journeys to be made on cycles

This site is being built on a very congested route see traffic counter and a couple of years ago the sea broke through the bund at clymping unless active travel is taken seriously by this developer then it should not be allowed
