Martyn

I have seen your comments on this application and wanted to discuss the issue of the courtyard treatment.

we fully appreciate the need to keep it 'open' and the planting that was proposed would just be a series of low and informal box hedging in order to demarc ownership for the plots. Our big issue this time that the committee refused permission for the conversion on basis of amenity space..

i note we have shown one length of fencing and we would happily delete this - would this satisfy your concerns or would you prefer at this stage that we remove the fencing and planting and show separation of zones by changes in surfacing materials or something similar.

I look forward to hearing from you.

Kind regards

Steve Jupp
