Essential maintenance is being carried out to the planning, building control and local land charges database during the week commencing 12 April 2021.
During this time there will be no public or staff access to any records held within this database, and it will not be possible to carry out any of the following tasks via the Arun website:

- Research planning and building control history
- View any planning applications, plans, agreements, tree preservation orders or competent persons data
- Submit building control applications
- Submit planning application comments
- Report any planning compliance issues

The publicity and consultation period for all planning applications that fall over this week will be extended by a further week to ensure no one is disadvantaged.

All other aspects of planning, building control and local land charges will be limited during this week and you are strongly advised to contact the individual departments before 12 April 2021 for specific restrictions during this time.

Dear Mr Rolison,

Southern Water have responded to the consultation sent to them stating they do not do not recommend variation of condition 2 until the Developer submits the detailed plan showing the 3 metres easement to the existing public foul sewer. Kindly submit a detailed plan, clearly indicating the 3 metres easement on either side of the public foul sewer.

I would appreciate receipt of the requested plan by the end of this week.

Regards
Anita Gardner
