Hello Anita

Further to discussions between Dean and Fiona, please find Dean's letter which confirms the details agreed.

Kind regards

Alison

Dear Alison

I write in connection with the sound level assessment prepared by Sharps Redmore¹.

"With regards to the Acoustic Report from Sharps Redmore dated 23rd February 2018 (Project N^o 1717351) it would appear that the applicant has missed the two closest residential properties to the site which are 1 Meadow Cottage and Paynters Croft (both on Burndell Road). Please could the calculations be re-done to take account of these residential properties?"

With the assistance of an annotated plan (high-lighting the properties of interest), the discussion led to the following agreement:

- ¹ Sharps Redmore. 23rd February 2018. Project N^o: 1717351
Ford Airfield, Climping. Kendall Group. Proposed concrete
batching plant. Sound Level Assessment

**Institute of
Aeronautics**

ANC | ACQUISITION & NOISE CONSULTANTS

2. The sound level assessment forecasts an impact amounting to +3 dB (see Table 6.7 of the Report). Arun District Council advise such an impact as being acceptable
3. Sharps Redmore are grateful for the clarification on the presence of residential receptors immediately adjacent to Tithe Barn. The statements in the Report at paragraphs 6.7, and within Table 6.7, making reference to the receptor point not being a dwelling, are to be ignored. The assessment finding does however remain valid for 1 Meadow Cottage and Paynters Croft.

I trust this is of assistance

Yours sincerely

Dean E Barke
