28 August 2018

Dear Mr J Ribbans

Town & Country Planning Act 1990 (as amended)
Town and Country Planning (Development Management Procedure) (England) Order 2015
Approval of details reserved by condition imposed under planning permission EG/41/17/PL relating to conditions No. 3 (Surface water drainage scheme), 4 (Watercourses), 5 (Watercourses), 6 (Surface water sewerage disposal), 7 (Tree retention & protection plan), 8 (Construction management plan), 9 (Screen walls & fences), 10 (Landscaping scheme), 11 (Cycle storage), 12 (Bin enclosures), 15 (Visibility splays), 22 (Flood risk assessment) & 23 (External lighting)
59 Elm Grove Barnham,,

Notification regarding the above application:

Condition Number 6

Construction of the development shall not commence unless and until details of the proposed means of foul and surface water sewerage disposal has been submitted to, and approved in writing by, the Local Planning Authority in consultation with Southern Water. The scheme as approved shall be implemented prior to the first occupation of the dwellings and maintained in good working order.

Reason: To ensure that the proposed development has a satisfactory means of disposing of foul & surface water sewerage in accordance with policy GEN9 of the Arun District Council Local Plan. This is required to be a pre-commencement condition because it is necessary to agree the foul sewerage system prior to commencing any building works.

Decision:

Arun District Council have decided to **APPROVE details reserved by this condition**
It is understood that the design of the foul sewerage on site does not meet the standards that would be reasonably required by Southern Water and so consequently should the sewers be built as shown, Southern Water would not be prepared to enter into an agreement to adopt the sewers or accept them in the future under any change of government legislation. The developer has been made aware of Southern Waters stance and intends to source a maintenance company to maintain and repair the sewers within the site boundary.

On this basis, Southern Water recommend discharge of condition 6 relating to foul disposal and the condition is therefore discharged.

Please do not hesitate to contact the above officer if you require any further assistance.

Yours sincerely
