This application has been dealt with in accordance with the Development Control Scheme protocol for small scale proposals which include up to 5 residential units or extensions to single units accessed from roads that do not form part of the Strategic Road Network (SRN). As such the comments provided by Planning Services should be considered to be advice only, with respect to this planning application.

This proposal has been considered by means of a desktop study, using the information and plans submitted with this application, in conjunction with other available WSCC map information. A site visit can be arranged on request.

This proposal is for the change of use from bank (A2) to retail shop (A1) use. The site is located on Barnham Road, a B-classified road subject to a speed limit of 30mph.

The application does not propose any parking provision or vehicular access to the site. However the LHA appreciate the sustainable location of the site, within walking distance of Barnham train station and local bus stops, and as such consider that there are viable options for sustainable modes of transport to reduce the reliance upon the private car. Under the WSCC Car Parking Standards, 5 car parking spaces may be provided for the proposal. Whilst on-street car parking is limited in the immediate vicinity there are comprehensive parking restrictions prohibiting vehicles from parking in places that would be detriment to highway safety. We would not consider that highway safety would be detrimentally affected through the proposed nil car parking provision. Furthermore, existing visitors to the bank would be by foot and considering that no parking is possible for the existing use the LHA anticipate that the level of traffic generated would be of a similar nature.

The LHA does not consider that this proposal would have 'severe' impact on the operation of the Highway network, therefore is not contrary to the National Planning Policy Framework (paragraph 109), and that there are no transport grounds to resist the proposal.
