

No 11 Saxby Close Barnham PO22 0GN

The first tree in question is T1 weeping willow this tree is located in the front garden of the property. Six months ago The main leader of this tree snapped out in high winds landing across the road, Low hanging branches are now affecting the road so to reduce any further risk we would like to pollard this tree to a stump where previously pruned.

T2 is the Sorbus located in the rear garden of the property The owner of the tree is now becoming increasingly concerned about the size of this tree and where it's located therefore he would like to crown reduce this tree by 2 m to its previous pruning points,

T3 and the largest is a mature Ash tree located on the rear boundary of the rear garden, this tree was previously pruned around four years ago The owner of the trees would like to maintain this tree at a sensible size so would therefore like to apply to Crown reduce this tree by 2.5 m to its previous pruning points
