Hi Simon,

Please see below in response to your email:

General

Please find attached a set of illustrative plans/elevations (in a zip file) showing all of the applications.

ATM

Full height vinyl will be applied to the panel as shown on Sign F on attached drawing ('coloured signage removing details').

Shopfront

Glazing : frosting to be applied internally to the existing window glazing which will be boarded up

Decorative glass panels : All glazing will be retained with the exception of that above the entrance door. The frames will be redecorated.

Bollards

Please see stainless steel bollards image attached.

Signage

With regard to the signage, please see attached a revised elevation removing the white lettering from sign B and removing the dibond graphic panel from the front elevation all together. I trust this will now be acceptable given the Conservation Officer's comments below.

If you have any further questions do not hesitate to contact me
