

Description of Proposed Works

To replace a pair of wooden gate posts and gate in the entrance of the driveway to Brook Cottage, Church Lane, Eastergate. The posts and gate will be made of Iroko Oak (hardwood) and will be in a light finish (preservative) which will be left to weather naturally. The dimensions of the gates are 1280mm high and 1600m wide. The posts will be free standing and placed in front of the driveway brick pillars. The gates will open outwards, as per the previous gates and the opening arc is within the grass verge and does not swing out over the road (see detailed drawings). The gates will only be opened to allow vehicle access, otherwise they will remain closed.
