Good afternoon Maria

Please find below / attached confirmation of the completed bat surveys. We believe this contains all information required in connection with bat investigations and indeed it concludes that the house is not a roosting location for bats, which is good news.

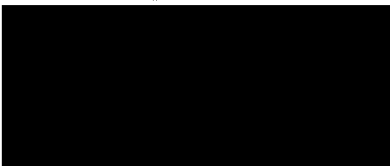

Please feel free to contact either Julie or me should you require any further information.

Kind regards

Daniel

Re: Second bat survey

Dear Stuart

With regards to the above project please note that a second bat survey, 'dusk emergence survey and dawn return to roost survey' has now been completed by Ecosupport. It has been concluded there are ***no bats present within the building or that will be affected by the development.***

We should receive the formal report within the next few days and will forward to you. Thank you.

If you have any further queries please do not hesitate to contact us.

Kind regards
