Arborist Surveyor: Mr Rob Dorey

MATURE BEECH TREE – This excellent example of a mature Beech tree was visited this afternoon by our qualified Arborist Mr Rob Dorey. Mr Dorey completed a ground based survey of the tree to assess the works required to help maintain the integrity of the tree to enable it to maintain the desired healthy TPO status. In our professional opinion, the Beech tree requires the following works to help regain healthy status.

Work Schedule/TPO Advice:

1. The entire tree requires a 1-2 metre reduction.
2. Slight crown thin to promote new growth and allow light to penetrate the lower canopy.
3. Removal of rubbing branches that cause decay/disease to branches damaged by stem friction.
4. All brash, branches and timber to be removed from site. All brash to be disposed of sustainably at our log yard at Sidlesham. Clear up all arisings and leave the site clean from all debris.

Estimated duration of works: One and a Half days with 3 members of staff.

Total Cost: £340

Tree surgery, hedge cutting, garden clearance, forestry & woodland management
