Subject: Planning application EG/98/14/PL

Dear Arun Planning

I am writing to express great concern if the above planning application for the redevelopment of 59 Elm Grove, Barnham is approved.

You might think that as I live at No. 24 Elm Grove my objection is to the actual building/construction of houses and access road which will be needed. NO, my REAL concerns are that

1) despite upgrade to the drainage in Elm Grove recently, the system could STILL not cope and the gully sucker had to move in yet again. This is happening with just one person living in a big house (No.59). Should the 3 detached houses be built, plus I guess that No 59 will undergo some form of re-configuration internally to allow more people to live in it, It is 20+ extra bodies will be using the drainage. IT WILL NOT COPE.

2) Are you sure that the garden in question is not in a flood area. There is a rife running at its boundary and the water table is very high. In heavy rain my back lawn becomes a small lake.

Thank you for taking time to read my concerns.

Yours sincerely

Mrs Pat Levett
