Good Afternoon,

The tree would be height 17.5m with a spread of 12.5m once work completed on the Lime Tree.
The branch to be removed (as per photograph provided previously) is the hanging branch at 12m to the west side of the tree. The deadwood removal would be general through the crown.

Kind regards

Dorothy

Dear Dorothy,

We would require the approximate size of the tree as proposed.
So I would assume, please correct me if I'm wrong, that the Lime tree's proposed size would be; height 17.5m with a spread of 12.5m once the works had taken place, based on the information provided via your recent email and the application form. Could you confirm this for me please.

With regard to the Monterey pine we would require details on the specific branch(s) to be removed i.e. lowest branch to the South West to be removed and/or proposed height of crown to be **m from ground level.

Essentially we are not looking for what you are taking off when it comes to the reduction of the overall height and spread of a tree, we are looking for what will be left behind.

Kind regards

Kathryn

Good Afternoon,

The measurements are the approximate sizes of the trees as they are at the present time.

Kind regards

Dorothy

Dear Dorothy,

I just want to clarify with you, are the measurements provided the size of the trees now or what your Client is proposing to prune them down to? We require the proposed measurements further to works having taken place.

Kind regards

Kathryn
